PROFESSIONAL SUMMARY

Senior frontend engineer who transforms legacy and product platforms into polished, accessible experiences using React, TypeScript, and scalable design systems.

At Booz Allen, I led the rebuild of a complex enterprise platform - migrating from Angular to React, integrating live Figma workflows, and introducing multi-theme systems and automated tooling that cut bugs, accelerated releases, and made onboarding seamless.

This work earned Platinum-level recognition and influenced client-wide UI patterns. I thrive in async product teams where clarity, accessibility, and clean architecture drive momentum.

SKILLS

React.js

Next.js

GraphQL

Docker

AFTON GAUNTLETT

Frontend Engineer

EXPERIENCE

Lead Engineer

Booz Allen Hamilton

Mar 2023 – May 2025

Chantilly, VA

- Led frontend architecture for 7 React applications, building reusable component libraries (Storybook) and unified theming for consistent UX.
- Drove remote collaboration and onboarding across a 95% remote team, making accessibility and design systems foundational across teams.
- Delivered a stepper-style data portal (inspired by TurboTax), collaborating with client leadership to secure project buy-in over competing designs.
- Integrated a custom LLM chatbot into dev workflows, automating onboarding with secure, air-gapped VSCode scripts.
- Bridged frontend/backend by testing and debugging with Postman, Docker, and SQL tools.

Software Engineer

Booz Allen Hamilton

Mar 2022 – Mar 2023

Chantilly, VA

- Led the full redesign of a flagship government platform, migrating from Angular/Node to React with TypeScript and functional components.
- Established the initial Figma-driven design system and trained the team, improving design iteration speed and consistency.
- Introduced modern tooling (Prettier, Husky, ESLint, TanStack Query), streamlining code reviews and boosting productivity.
- Authored documentation and onboarding guides, reducing new hire ramp-up and enforcing accessibility (WCAG/508).
- Enforced strong Git practices, cutting merge conflicts and enabling faster code reviews and rollbacks.

Founder & Principal Developer

Gauntlet Designs, LLC

Jul 2020 – Jan 2025

Reston, VA

- Delivered 10+ custom web apps for small businesses and Potomac Dining (sixth-largest Applebee's franchisee), leading projects from scoping to launch and multi-year support.
- Built a custom employee portal and fundraiser scheduler for Potomac Dining, migrating legacy data and maintaining 5+ years of reliable operation.
- Deployed modern solutions (React, Next.js, Vue) on Firebase and Vercel, establishing reusable design systems and accessible, responsive frontends.
- Managed requirements, project delivery, team coordination, and full-stack deployment for all clients, while handling SEO and branding.

UI Developer

IronClad Technology Services

Dec 2021 – Mar 2022

Reston, VA

- Evaluated frontend frameworks and delivered Figma wireframes to shape scalable UI architecture for DIA web apps.
- Authored UI documentation and design standards, collaborating with engineers to define requirements for accessible, component-based platforms.

AWARDS

- Platinum, Booz Allen (2024): Led full redesign of flagship web application - improved user engagement and significantly reduced bugs.
- Gold, Booz Allen (2023): Built an event registration platform used by 100+ users, delivering improved scheduling and agenda access.
- Gold, Booz Allen (2022): Delivered interactive homepage prototype using advanced Figma techniques and animation.

Frontend Developer

Global Dimensions, LLC

Aug 2021 – Dec 2021

Springfield, VA

- Built a custom, animated timeline in Vue/Vuetify for NGA's analyst platforms, solving complex UI challenges and enabling new data visualizations.
- Led accessibility upgrades (508/WCAG), partnering with design and accessibility experts to deliver compliant, audit-ready interfaces.
- Mentored junior developers on frontend fundamentals and best practices, accelerating team onboarding.
- Prototyped motion-driven UI concepts with Adobe XD and After Effects, enhancing geospatial data clarity for users.

EDUCATION

Security+ Certification (Active)

CompTIA

Nov 2022

Web Development Certificate

George Washington University

Aug 2020

User Experience Design Certificate

General Assembly

Dec 2022

WEBSITE, PORTFOLIO & PROFILES

- linkedin.com/in/afton-gauntlett
- github.com/aftongauntlett
- aftongauntlett.com (Vue-based; new React version in progress)

PROJECTS & VOLUNTEER

React Portfolio

React 19, Vite, TypeScript, Tailwind CSS

Mar 2025 – Present

- Built a fully accessible, custom-themed portfolio and reusable component library. New React version launches Summer 2025 (current site runs on legacy Vue).
- Live: aftongauntlett.com | Code: github.com/aftongauntlett/react-portfolio

React Tutorial Project

React, Vite, TypeScript, Tailwind CSS

Mar 2025 – Present

- Currently building an interactive, story-driven coding platform inspired by Portal, Half-Life, and The Stanley Parable; features modular full-stack architecture and adaptive tutorials. Public alpha launches Summer 2025.
- Code: github.com/aftongauntlett/react-tutorial

Technical Operations Manager

MAGFest

Jan 2010 – Jan 2020

- Led 200+ tech ops team for 20,000+ attendee festival and contributed to Tuber and Ubersystem open-source projects - collaborating with devs from Valve, GitHub, and Microsoft to build logistics/event platforms used by fandom events nationwide.
